Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Representative for applicant requested clarification and discussion of proposed amendments to the claims. Examiner stated that the pressure-exerting jaw, as written in the claims is positively recited, and is considered an element in the device. This was noted as a "pressure point" in the OA dated 8/24/2007. A possible claim amendment was discussed, where the movement of the pressure-exerting jaw was further defined to move independently and transversely to the fixed jaw and peg members. Further amendments may require search and consideration, however, it was agreed that the amendments as discussed had overcome the prior art of record.
